Digital Inclusion VET Project

We are thrilled to announce the launch of the Digital Inclusion VET project, funded by the prestigious Erasmus+ program. Our main goal is to enhance Vocational Education and Training (VET) to facilitate the reintegration of unemployed individuals lacking digital competencies into the rapidly evolving industry 4.0.
we aim to achieve several objectives:

- Enhancing Digital Skills: By upgrading the digital and virtualization abilities of VET trainers and teachers.
- Developing Innovative Teaching Methodologies.
- Empowering Individuals with Updated Digital Competencies.

Transnational Meeting in Xirivella
1/02/2024

The 1st transnational meeting in Xirivella was a remarkable gathering that set the stage for fruitful collaboration and innovation within the Digital Inclusion VET project. Partners were warmly welcomed at the IES Gonzalo Anaya, where they had the opportunity to present their organizations and contribute their unique expertise.

The privilege of meeting with the Mayoress of Xirivella at the town hall further solidified collaboration with local authorities, reinforcing their support and dedication to our mission of digital inclusion. With renewed enthusiasm, we move forward, committed to empowering individuals through vocational education and training in the ever-evolving digital landscape.
